Technical Trainer

EduBridge

(School of coding)

Introduction:

Our project explains about the Online recharge for mobile in Web site name Online Recharge Portal. This project mainly explains the various actions related to Recharges. You can search various types of recharge planes, Offers and the Subscribes according to category.

Our Project Include Modules:-

- Admin Module
- User Module
- Operator Module

I have developed this Application in **Java, JSP, Servlets and MySQL**. It's a web-based projects so I have used **HTML, CSS, JavaScript and Bootstrap also**.

The main feature of the project is to make easier while recharge our mobile. You can access this website from anywhere and everywhere.

In Admin module, admin can add the Category and Recharge in the specific category. He can also view the total number of users at present in the website. And category and product details also. Admin can only see the admin page and cart if he wants to order something.

In User module, user can access the website and get a Offers for his mobile to get a best plane and shuffle by category. New user can register and login after that to shop. In Cart, admin and user both can access, they can add the planes and choose for best plane if they want.

Software Requirements:

Front end: Java/J2EE technologies (Servlet, JSP), HTML, CSS, JavaScript, Bootstrap, Hibernate.

Back end: MySQL workbench 8.0.23CE.

Middleware/Server: Apache Tomcat v8.5. IDE: Eclipse IDE for Java EE Developers

Browser: Best result on Google Chrome

Operating System: Window 10

Data Dictionary:
